TECHNICAL DATA SHEET

Fastcap: 2p-10 Solokit

➤ **DESCRIPTION:**

Great for assembling a kitchen chair or repairing a broken table leg, this adhesive kit works on a wide range of surfaces from wood to plastic. It includes a 2oz bottle of adhesive, and a 12oz aerosol spray can of activator.

FastCaps two-part bonding system takes a mere 10 seconds to execute. Simply apply the adhesive to one surface and spray activator on the other. Pressing the two sides together creates a firm, permanent bond that endures all weather conditions.

FastCap estimates a bond's curing time as 30 seconds. In addition, this powerful glue won't clamp, making it ideal for use on hard joints. A special no-clog cap helps prevent glue clumps. Refills of both activator and adhesive are available.

KEY FEATURES: 2P10 Thick Adhesive

No-clog cap;

Powerful adhesive kit; for carpentry or other bonding projects;

Easy to use; spread adhesive on one item, spray activator on the other, hold together for 10 seconds.

Permanently bonds almost all surfaces for lasting work pieces

Designed for use on porous surfaces such as particleboard

KEY FEATURES: 2P-10 Adhesive Activator (AEROSOL)

Directions: Make sure surfaces to be bonded are clean and dry.

1/ Spray activator onto one surface. Allow to evaporate.

2/Apply adhesive onto other surface

3/Assemblance and hold for 10 seconds

For post assembly use (this allows more time for alignment)

1. Apply adhesive to one surface.
2. Assemble and align parts.
3. Topically spray activator over bond area.
